MERN Stack – Final Ex

Create a Web Site for managing Students.

Each student has:

- id
- Name
- Faculty
- Grades – An array of objects with:
  - o Profession
  - o Score

The Front End (React based) will have the following "pages":

- Students Page – Present a table with ALL students data (including grades)
- Add Students Page
- Update Student Page
- Delete Student Page – with a table of students names as links. Every click on a link will delete the student

- After each operation, redirect to the students page
